Fruit&Vegetable Juice Clarification

For fruit&vegetable juice filtration, membrane system can effectively remove bacteria, pectin, rough protein; retain nutrient and original flavor at the same time. No additive, no pollution.

Kaimi built more than 200 juice clarification production lines in China, total capacity over 400T/H , occupied 90% Chinese market, exported to Southeast Asia and Europ as well.

· Project Brief

· Project site: Dalian China

· Treatment capacity: 400T/D

· Start at: June of 2010

· Model: KMTC-0412-PU

· Specification: 12.5mmPVDF，F100TM

· Project Brief

· Membrane type: Sanitary membrane module

· Designed flux: 80LMH

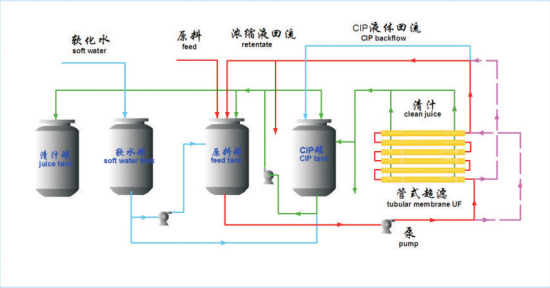
· Membrane per set: 80 PCS; Series No: 16 PCS

· Component Distribution: 5×16/Set

· Treatment per set: 33.3m^3/H

Project Overview

Tubular Membrane System



Project Case >>>

· Processible Fruit Juice

Orange Juice

Apple Juice

Cucumber Juice

Pineapple Juice

Carrot Juice

Peach Juice

Mulberry Juice

Kiwi fruit Juice

Blueberry Juice
